

To situate the candidate's level in relation to the Pix reference, you can refer to his overall Pix score and the associated level

Level	Scores	Description
	0-63 pix	You have completed your Pix certification test, but your results do not allow you to obtain the first level.
novice 1	64-127 pix	You have simple digital practices and often need help. You know how to find your way around digital interfaces that you have already used (phone, tablet, computer). With occasional help, you can visit a website, read your messages (SMS, emails, etc.), and reply to them. You can use simple applications on a phone or tablet and access online services.
novice 2	128-255 pix	You have simple digital practices, with help when the situation gets complicated. In your usual digital environment you can search information on the web, download a file and find it, consult and send electronic messages, connect your devices to the Internet (computers, tablet, phone). You can enter text with simple formatting and save it. You know that some information published online is fake and it is important to protect your accounts with secure passwords.
independent 1	256-383 pix	You have simple digital practices autonomously in most common situations. You know how to navigate the web to conduct in-depth research with relevant information. You know how to participate in collaborative activities (messaging, shared calendars, video meetings, shared documents). You know how to use the most common features of common software (word processing and spreadsheets). You are aware of the risks associated with your digital practices and the need to secure them, as well as the environmental impact of your digital uses. You know how to solve common problems (passwords, connections).
independent 2	384-511 pix	You are comfortable in all common digital situations and have a good command of the usual vocabulary associated with digital technologies. You know how to implement an information search strategy on the web and via social networks and verify the reliability of the information found. You know how to use the main features of collaborative tools and create documents using different software (word processing, spreadsheet, slideshow, images). You can implement safe practices for personal data protection and the security of your devices. You know how to adapt your digital practices to limit their impact on the environment and your health.
advanced 1	512-639 pix	You have advanced digital practices and solid knowledge that allow you to face new situations. You can help others. You are able to use specialized tools to search for information in a reliable way, manage social networks, and edit images and videos. You are able to produce data analyses and graphical representations. You know how to set up a digital environment (installation and configuration). You are aware of the issues surrounding tracking and data collection. You understand the environmental and societal impacts of digital uses and know how to adapt your practices.
advanced 2	640-767 pix	You have advanced digital practices and in-depth knowledge, which you can make use of, for yourself or others, in a creative and secure way. You can help others improve their skills. You fully control your digital environment to create and disseminate content, communicate, and collaborate. You know how to manage your online presence and adjust the settings relevant to your posts. You know how to program and automate certain tasks (data processing, backups, updates, etc.). You can help others secure their practices, particularly by limiting their environmental and health impact.
expert 1	768-895 pix	You have optimized digital practices and expert knowledge that allows you to address complex situations. You are able to analyze a need, consult the technical documentation, and evaluate digital solutions for implementing or even developing tools yourself. You understand the economic, societal, and ethical issues associated with digital technologies and can critically reflect on your practices. You are able to train yourself in new techniques and learn with ease the latest technological advances, such as those made possible by artificial intelligence.
expert 2	896-1024 pix	You are able to document your solutions to new and specific problems for sharing.
